

Position Title: Senior Java Developer

Job Description

NARTech, Inc. is currently seeking a **Senior Java Developer** to join our growing company. Named as a Washington Technology “Fast 50 Government Contractor”, we are a small business, appraised at CMMI Level 5.

We currently have an open position for a Senior Java developer with a strong background in building scalable, reliable and high-performance web applications using the **Oracle stack including WebCenter and WebLogic**. Responsible for building and maintaining internal and external Web-facing applications, the developer will be working with a team of experienced analysts, developers and business resources in order to build enterprise systems that support mission objectives.

We are looking for a dynamic, talented application developer who is ready for a challenge where teamwork, technical ability, client interaction, and problem-solving skills are essential.

Responsibilities

- Designs, develops, enhances, debugs, and implements software. Troubleshoots production problems related to software applications.
- Researches, tests, builds, and coordinates the conversion and/or integration of new products based on client requirements. Designs and develops new software products or major enhancements to existing software.
- Addresses problems of systems integration, compatibility, and multiple platforms.
- Consults with project teams and end users to identify application requirements.
- Performs feasibility analysis on potential future projects to management.
- Assists in the evaluation and recommendation of application software packages, application integration and testing tools.
- Resolves problems with software and responds to suggestions for improvements and enhancements.
- Acts as team leader on projects.
- Instructs, assigns, directs, and checks the work of other software developers on development team.
- Participates in development of software user manuals.

Skills

We require the following skills:

- Excellent application system design and development skills
- Strong experience in architecting, implementing and managing high performance scalable **J2EE applications** on **Linux/Unix platforms** with one or more of the following: **Java Web Services, Oracle SQL Developer, JSP, EJB, Struts, Spring, Ant, JSF JMS, XML, JBoss, JDeveloper**
- Development experience with **Oracle WebCenter and WebLogic is a must**
- Excellent knowledge of J2EE architecture/design patterns, Object Oriented Design methodologies, SOA, data modeling techniques and SOAP.
- Strong experience designing / developing with n-tier architectures (UI, Business Logic Layer, Data Access Layer)
- Solid knowledge of OOP software concepts, design patterns, and best practices
- Ability to adapt quickly to an existing, complex environment and learn new concepts / software technologies as needs arise
- Very strong SQL experience of writing complex queries and developing views
- Strong problem-solving and analytical skills.
- Self-motivated, independent, detail oriented, and a responsible team-player
- The ability to communicate effectively - both verbally and in writing.

The following skills are desired:

- Experience writing custom Java code to interact with an LDAP server
- Experience with Web Services security, to include OPSS and/or Oracle Web Services Manager (aka WSM / OWSM)
- Experience with Java & Oracle Enterprise security layers

Position Title: Senior Java Developer

- Experience with Oracle ADF including AJAX driven ADF UI development

Experience

We seek a Senior Java Developer with **10+ years of systems development lifecycle** experience including **8+ years of Java and Oracle development experience.**

Requirements

- **B. S. degree in Computer Science or similar degree is preferred**
